

Destroy Viruses in the Air

Powerful UV Light & HEPA Filter Protection in a Portable Unit

Breathe Easier

Whether you're worried about the current Coronavirus pandemic or future outbreaks, facilities using air purifiers with ultraviolet germicidal irradiation – like RP Fedder's UV Unit – can breathe easier.

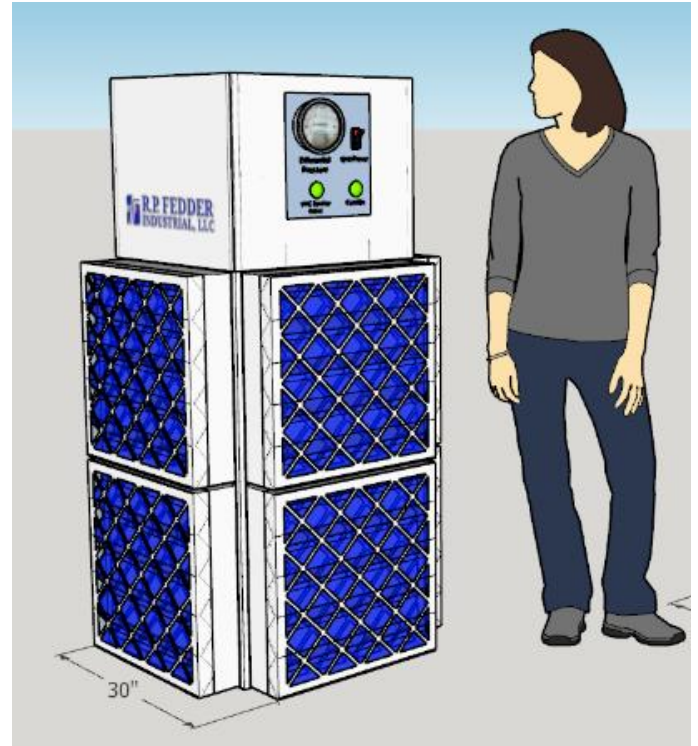

Perfect for larger gathering spaces such as:

- Childcare centers, cafeterias, community centers, doctors' offices, restaurants/bars, coffee shops, hotels, offices, retail establishments and other high-density areas*

Just plug it in to start breathing cleaner, safer air.

Stop airborne viruses and bacteria from spreading inside your facility.

Protect your workers. Protect the public.

*ASHRAE recommends using UVGI in high-density areas during the COVID-19 pandemic.

UV Germicidal Irradiation & HEPA Filtration to Guard Against Airborne Diseases

This unit features ASHRAE's recommended combination of:

- a MERV-8 pre-filter with HEPA combo
- UV sterilization dosage of 2,000 $\mu\text{J}/\text{cm}^2$ **
- Available in 3 sizes to purify spaces up to 1,650 square feet

**1,935 $\mu\text{J}/\text{cm}^2$ required for 90% first pass sterilization of Influenza A.
611 $\mu\text{J}/\text{cm}^2$ required for 90% first pass sterilization of Coronavirus, incl. SARS.
